Ensure compliance

Keep people safe

Gallagher's industry-leading integrated security solutions provide complete site control from one central management platform to keep your people safe and deliver a seamless experience for your community.

Secure site access

Ensure people only have access to areas they are qualified to be in, and effectively manage compliance with your organizational policies and government regulations.

- Deter, detect, and respond to unauthorized entry on site with our perimeter detection solutions.
- Integrated access control in highly secure areas where HR and SMS data automatically check competencies and enforce compliance with regulations and standards.
- Check personnel at the door to make sure they are capable, qualified, and compliant with a wide range of standards and regulations.
- Monitor inductions, licences, training, and qualifications to only allow people access to areas they are sufficiently qualified to be in.
- Identify and respond to unauthorized intrusions in a timely manner, even on disparate sites in remote locations.

Rapid evacuation and lockdown

Gallagher Command Centre helps you respond swiftly and accurately during emergency situations such as fire, natural disaster, terrorism, or active shooter events.

- Enterprise level lockdown capabilities provide an immediate, scalable response to emergency situations, along with an audit trail for review after the event.
- Quickly identify, locate, and respond to any potential risks on site, and notify changing threat levels directly to staff phones using Broadcast Notifications.

- Ensure staff and visitors are kept safe in situations that change at the drop of a hat using Command Centre's flexible capabilities e.g. during an emergency crisis such as a mass shooting or earthquake.
- Optimize personnel flow and safety on-site during a drill or emergency using Mobile Evacuation.
- Stay aware of your staff and visitor's location in real-time using Tag Board on desktop and Mobile Evacuation on mobile phones.

Visitor and contractor management

Control access using the Gallagher Visitor Management interface to create an open yet secure environment that keeps visitors on site safe.

- Ensure visitors and contractors can be accounted for by monitoring their access card, including their last door access. Visitor management integrations provide effective control of who is on site and where.
- Manage visitor and contractor access on and off-site, including updating visitor details, capturing photos and printing visitor labels, assigning escorts and access cards.
- Ensure contractors are capable, compliant, and qualified to be on site before their access is granted using competency-based access management.

Protect assets and data

Ensure operational continuity and avoid significant costs associated with loss of supply by protecting your site's assets from theft and damage.

Protect valuable assets

Gallagher's intelligent access control and perimeter solutions provide management and protection for valuable assets and resources on your site.

- Control access to restricted areas with valuable assets such as: machinery, plants, furniture, and inventory.
- Perimeter guard patrols can be reduced or redeployed to areas of greater need.
- Supervise access to restricted areas with intelligent alarm monitoring and advanced site map functionality.
- Use zone counting to monitor the number of people in an area on site.
- Avoid significant costs associated with business interruption through security breaches, theft, and vandalism.
- Produce comprehensive audit trails for a high level of traceability, for both internal use and regulatory audits.

Reduce cyber risk

At Gallagher, our solutions are designed from inception to be as cyber secure as possible. We continuously evolve our solutions to meet the changing threat at a software and physical level, building in robust cyber security at every stage.

- Ensure peace of mind through the use of the latest continually evolving software technologies and cyber security counter measures, eliminating the fear of hacking and site down-time.
- Reduce cyber security risks through Gallagher's end-to-end encryption and user authentication.
- Identify potential vulnerabilities within your system using Gallagher's Security Health Check, allowing you to proactively manage and respond to new and evolving security risks.
- Implement regular software and hardware updates across all devices to stay current with cyber threats and effectively manage obsolescence.
- Receive expert configuration advice to deploy the system in a secure environment, and a Gallagher hardening guide to further strengthen each component.
- Ensure a layered security approach to networks, data and systems using Gallagher's multi-factor authentication.
- Gallagher carries out internal and external penetration testing during development to identify vulnerabilities before updates or new solutions are released.

Optimize facility use

Gallagher Command Centre allows you to efficiently manage multiple sites and buildings, each with different requirements, from one centralized system. Gallagher solutions optimize facility use and reduce unnecessary overheads by improving facility management and energy consumption.

Simplify administration

Streamlined business processes and operational flow are essential to any organization. Simplified administration processes save time and money, while also improving staff productivity.

- One platform to manage total security reduces costs associated with managing multiple disparate systems. Eliminate duplication of administration tasks and improve staff availability.
- Gallagher Command Centre administration platform is easy to use, particularly important for non-technical operators.
- Validate staff working hours by knowing who is on site, and when, with intelligent access control.
- Ease administration burdens with simple, automated, customizable reporting. Powerful reporting saves time and provides an audit trail of events to document visitors on site, facility use and event reporting.

Business efficiency and cost savings

Gallagher's integrated security solutions allow you to manage site security, control building management systems, enforce compliance and increase system efficiency – reducing operational and training costs, energy use and utility costs.

- Total site management with one centralised platform to manage total security on site. Video Management Systems can be integrated with Command Centre allowing operators to use a single system for total security.
- Remote monitoring of multiple sites from a single platform allows business owners to be in full control of their security solution (perimeter and access control), controlling downtime while significantly reducing theft and damage.
- Monitor and control HVAC (heating ventilation and air conditioning), air quality and other building management systems using the BACnet protocol.
- Manage cameras, electronic gates, and car park lighting through Command Centre to enhance safety and efficiency.
- Moving to a single card for many functions on site reduces expenses associated with storage and replacement of lost access cards, ID cards, and keys.
- Improved access control and physical security barriers on site means fewer guard patrols are needed.

Future-proof for growth

Implement a comprehensive yet flexible security solution with the ability to easily scale the solutions, while remaining centrally managed.
- Scalable and highly flexible, allowing for future growth and expansions/upgrades on site.
- Ability to extend to distributed sites featuring multiple buildings, all with different requirements.
- Eliminate logistical issues recalling and re-issuing access cards for a new system and maintain security during access card migration.

- Ability to integrate with human resource management systems makes it easier to manage two systems during a migration process.
- Reduce costs during upgrades with the flexibility to use existing cabling infrastructure.
- Once migration is complete, switch your readers to a more secure mode with a click of a button – no need to go to the individual readers.

"

We have multiple areas which need specific security requirements. As the Gallagher system can integrate with multiple security products ranging from CCTV to biometric readers, it ensures the right people have the right access to specific areas on site.

"

Meet compliance and competencies

Implement, enforce, and report on business policies and processes at every point using physical security infrastructure and Command Centre.

Ensure compliance and manage competencies

Gallagher's continually evolving technology is a complete site management solution that creates new possibilities and helps you achieve compliance and best practice at all levels of your business.

- Monitor inductions, licenses, training, and qualifications to only allow people access to areas they are sufficiently qualified to be in.
- Integrated access control in highly secure areas where HR and SMS data automatically check competencies and enforce compliance with regulations and standards.

- Real-time audit trail provides prompt and reliable decision-making information.
- Use random cardholder selection to check competencies and licensing, as well as drug and alcohol testing.
- Reduce financial penalties for non-compliance under audit and legal risks arising from employee accident claim.
