A global security solution delivering mobile access control  
across multiple sites worldwide

Global investment firm, Ninety One, has offices located across Africa, the Americas, Asia Pacific, and Europe. A recent refurbishment of their headquarters in London, supporting global offices in Hong Kong, New York, Pretoria, and Port Elizabeth, saw them work with certified Gallagher Channel Partner, SecureWais UK, to implement an efficient, centrally deployed access control system that utilizes one credential across all of their global offices.

---

With the refurbishment coinciding with the first wave of the COVID-19 pandemic, SecureWais UK, recommended a contactless access control solution and Gallagher's Mobile Connect. The unique mobile access application, which offers optional two-factor authentication, easily administered credential provisioning, and a secure, on-phone Digital ID, is ready to roll out to Ninety One's global employees as they return to their offices.

Nick Baker, Workplace Global Coordinator at Ninety One, said: "The ease with which we can deploy access credentials for any of our employees globally has provided a huge step change – particularly when we return to travel between global offices using a single credential."

Nick also praised the suite of reports available within Gallagher's Command Centre. The team now have access to automatic daily reports to view personnel in the building, which go straight to Head Office for any COVID-19 track and trace management. This functionality has proven vital for managing risks and protecting the health and safety of employees and visitors.

Tahera Hammond, Global Head of Workplace at Ninety One, was instrumental in calling for the global security strategy and said, "Our new security solution has enabled the whole team to seamlessly transition to the use of a mobile access credential and the easy deployment from one central point has been pivotal to the success of the new strategy."

The logo for Ninety One is displayed in large, metallic, three-dimensional letters on a light-colored wall. To the left of the text is a vertical rectangular opening that reveals a modern office interior with a glass railing and a person walking in the background.

The overall success of the project has been down to the relationship between SecureWais UK and Ninety One.

“SecureWais UK proposed and delivered a solution that matched our brief, with a brilliant ability to swiftly adapt to the changing world we’ve all experienced in 2020. Whilst the pandemic continues to hinder everyone’s progress, the team at Securewais UK responds to every part of our evolving brief and delivered a solution that is perfect for our business,” said Nick.
